

Professional Services Overview

Aligned Assets' enthusiastic and dedicated consultants strive to deliver the highest quality Consultancy, Support and Training helping each customer to realise the full potential and benefit of their GIS Investment.

Aligned Assets' are committed to offering a range of services that are accurate, cost-effective and pertinent to the needs of the end-user, whilst remaining sensitive to the dynamic, changing environment.

▲ Consultancy & Development

Consultancy

Aligned Assets consultants are experienced in all aspects of GIS development and can provide advice, specifications, costings, and project management for GIS initiatives.

Solutions will always be pertinent to the needs of the customer. Aligned Assets consultants will deliver solutions to designated specifications whether it is integrating GIS with an existing system, formulating a web-based mapping application, Data Management, Information Management or formation of an apt GIS strategy. Solutions will be designed to meet and exceed internal and external expectations, especially for councils in regard to **e-Government** regulations.

Bespoke Development

Aligned Assets develops desktop and web-based products and solutions for the existing MapInfo resellers and customers across the UK.

Aligned Assets consultants are Specialist developers of the MapInfo product range.

Project management

Aligned Assets' consultants adhere to the industry methodologies and standards such as Prince 2. Project Managers are assigned to ensure the implementation and overall project are completed on schedule and meet the specified requirements.

BS7666 Consultancy

Aligned Assets, as developers of MapInfo's own BS7666 solution, are well placed to meet the needs of different councils, providing timely and cost effective advice and solutions. Aligned Assets have provided BS7666 consultancy services for many authorities in the UK. Our in depth knowledge of the standard and workings of the toolbox combined with our varied experience with Local Government data means that we can provide simple solutions for complex data issues.

Customer testimonials'

"Aligned Assets have done various pieces of consultancy work for Bolton MBC. Aligned Assets are good and responsive to customer needs and I am sure that I will continue to use their skills for future projects."

Moira Livesey
LLPG Manager, Policy
Transport & Planning
Environment Department
Bolton

'Aligned Assets provided us with bespoke training on MapInfo Professional. The training was made even more meaningful by using our own data. I think we challenged AA with one or two innovative approaches and unusual requests for information from our data. However, these challenges were fully met. We would have no hesitation in recommending Aligned Assets with their friendly and philosophical approach to the training and their attitude to the challenges that we set them. The training guides are clearly set out and easy to follow.'

Tim Baldly & Andrew Johnson, NPS Property Consultants Ltd

▲ Support

Aligned Assets are committed to helping the customer extract the greatest potential and benefit from their investments. Aligned Assets are specialists in MapInfo and BS7666, as well as their own products.

Aligned Assets is both a developer of products and a technical resource for the existing MapInfo resellers and customers around the UK.

Aligned Assets offer two forms of professional support:

- ▲ **Technical Support**, for MapInfo customers and clients using customised IT solutions, Aligned Assets provide ongoing technical support
- ▲ **BS7666 Support**, Aligned Assets consultants are experienced in all aspects of the BS7666 Toolbox and the BS7666 Standard itself. Consultants are dedicated to fashioning fast and effective solutions to any problem of any varied complexity.

▲ Training

Aligned Assets offer a number of training courses, which are designed to ensure their clients utilise the potential of GIS. Training is often bespoke, tailored, solution based courses built upon real situations and real data sets, ensuring a much thorough training experience.

MapInfo Training

Aligned Assets trainers are experienced in providing MapInfo Professional training.

- ▲ MapInfo Professional training begins from basic training through to more advanced courses, and is available over 1 or 2 day courses.
- ▲ MapBasic training is also offered by Aligned Assets in a standard 1 day course

BS7666 Training

Aligned Assets realise that complying with the British Standard 'BS7666' is a complex task and that many local authorities will require specialist advice or help.

- ▲ To assist Local Authorities with the BS7666 set-up Aligned Assets offers a workshop that is also available through MapInfo. The workshop is an intense and comprehensive one-day event.
- ▲ Aligned Assets offer bespoke training, designed to help you understand and overcome the complexities of BS7666.
